

COMPLETIONS IN EASTLAND FIELD

New Wells Brought In During the Past Week in Eastland County.

Eastland, Texas, April 21.—The following completions were made in Eastland county during the week ending Saturday:

Monitor Oil company No. 7, W. E. Martin, southwest corner of farm. Shown on map of W. A. Patton farm. 341 ft. deep; 150 ft. from the west line of the farm. W. A. Martin, survey, offset to Emma Terrill, No. 3; timber on ground.

Oil Production company, No. 11, P. W. Taylor, 500 feet north of No. 10; timber on ground.

Oil Production company, No. 12, P. W. Taylor, 400 feet north of well No. 2, offset to Emma Terrill, No. 3; timber on ground.

E. N. Gillespie, No. 1, O. J. Cotton, southwest corner of farm; timber on ground.

Mid Kansas Oil and Gas company, No. 3, J. H. McCleskey, southeast corner of farm; J. A. Parks, survey.

2. Hammon, No. 1, Bowles, northeast corner of farm; no being built.

Jack Sanker, No. 1, Hoxz, southwest corner of the 19 acre tract of the J. S. Salinas survey; pig up.

Jack Sanker, No. 2, Hoxz, northwest corner of the ten acre tract; pig.

Magnolia Petroleum company, No. 1, N. O. Bearden, southwestern part of farm; J. S. Salinas survey; timber on ground.

ARELEGE WELL AT ROBERT LEE SPUDDEN IN

Robert Lee, Texas, April 21.—The Arelege well in the northwestern part of Coke county, under the management of Allen & Straus, has been spudded in. This company has been making preparations for several months to start drilling. Mr. Arelege, who is in Robert Lee, speaks very encouragingly concerning the outlook.

At the Robert Lee oil well, a lot of the wood which was stacked up near the well accidentally caught fire and burned. This will likely delay operations at the well.

Work at the Tackey well is on a standstill, until the derrick which was demolished during the recent storm, can be rebuilt.

The West Texas Production company will immediately rebuild the derrick which was blown down at the Hamilton ranch and work will go forward, with only a few days' delay.

Burk-Waggoner Shoots Stream Above Derrick

Six Inch Column Of Pure Oil Blows Bailer From Hole.

Excitement is again running high in Burk Burnett and threatens to be greater than ever before, according to a wire received Monday by J. F. Dunham, Jr., vice president of the Horse-shoe Bend Oil association, whose holdings are less than two miles from the Burk-Waggoner well.

It was at fever heat Sunday when it became known that the Burk-Waggoner well, after being drilled ten feet further into the oil sand Sunday morning, while the well was being cleaned out, blew the bailer out of the hole and shot a six inch stream of pure oil above the top of the derrick. This well has now been drilled about 20 feet into the oil sand, and promises to be the biggest well yet brought in since the Fowler well, according to reports.

U. S. SHIPPING BOARD IS BRINGING MUCH TEXAS OIL

Washington, D. C., April 21.—The Emergency Fleet corporation, division of operations, has asked bids on from 400,000 to 600,000 barrels of bunker oil to be delivered at Galveston, Texas, within one year. A larger quantity may be bid on for delivery over two years. The schedule of delivery calls for 25 percent, May and June; 4 percent, July; 5 percent, August; 4 percent, September; 5 percent, October; 5 percent, November; 11 percent, December; January, 12 percent; February, 13 percent; March, 14 percent and April, 15 percent.

It is the first class merchantable, suitable for use as fuel for steamship operation.

In Washington it is said that the price of the oil will largely influence the uses of the ports.

SANGUINETTI HEADS PLAN TO DRILL FOR OIL NEAR YUMA

Yuma, Ariz., April 21.—Keen interest taken locally in the Texas oil fields has revived stories of the probability of striking oil in this locality. For 20 years the Colorado river occasionally has carried "oil streaks" that have been lighted and have burned. Oil seeps are declared existent in the Gila valley, east of Yuma, a short distance, where, in 1903, O. F. Townsend prepared to sink a well on a site he declared most favorable. But he estimated the cost of the well at \$10,000 and refused to proceed with only \$1000. All that he could get subscribed locally. Now the same project has been taken up by E. F. Sanguinetti, the leading Yuma capitalist, and Joseph Balas.

First Well In Next Sunday's Papers.

The Greater Texas Oil Company

3 Wells In Burk Burnett

Within sixty days—at least one of our THREE wells should be producing. Are you going to be one of those to admit passing up an opportunity?

We believe that everyone is familiar with our proposition. We have told you that we are POSITIVELY going to drill THREE wells on our valuable leases in BURKBURNETT, where 97 wells out of every 100 drilled are producers. Could it even be POSSIBLE for us to get dry holes in every well? You couldn't find a man who KNOWS the Burk Burnett field that wouldn't wager that we get OIL in every well we drill.

Mr. Crockett is leaving today for the oil fields to complete arrangements for developing El Paso-Burk Burnett's wonderful holdings. Of course, the stock is nearly sold—we simply want you to remember this, when your neighbors begin to get big DIVIDEND checks from this company—YOU TOO, HAD AN OPPORTUNITY TO BUY AT PAR.

El Paso-Burk Burnett
Oil Company

EL PASO, TEXAS.
Capital, \$125,000.00. Shares, \$10.00 Each.
Fully Paid and Non-Assessable.

TO EXTEND PIPE LINE IN TEXAS

New Refinery Is Boosting Production of Wells At Iowa Park.

Wichita Falls, Tex., April 21.—The Liberty Pipe Line and Refining company will extend a line through the Lockridge field to the section opened up by the Vat well. Operations are on the boom in the Vat well vicinity now. It is a few miles east of the Wilkes tract where the original Wilkes well was brought in last fall. This well opened up the territory, ten miles southwest of Iowa park, where operations have been of more than ordinary interest.

Operators are receiving much encouragement to develop the shallow territory near Iowa Park with the building of the Sunshine State oil and Refining company's loading racks at Iowa Park and the pipe line to the southern extensions of the shallow field.

Another refinery will be built at Iowa Park by the New Era Refining company, of Orlino, Okla. It will have a capacity of 2500 barrels daily, and is capitalized at \$250,000. A 50 acre site has been purchased at Iowa Park by the company. The Denver road is building a spur to the refinery site.

Much production is being purchased by the Sunshine State Oil company in the Iowa Park shallow pools. Operations are centered around four localities in the new shallow field. They are the Zink wells, Watkins wells, Vat well and Lone Wolf well. Now completions are being made from time to time since the discovery well in each locality was brought in several months ago. Much enthusiasm is caused by each new completion.

There is pronounced activity on the Grant land near the Vat Oil and Gas company's wells. Locations have been made for drilling two deep tests.

FRONTIER COMPANY WILL ENTER TEXAS AND TAMPAICO

The Frontier Oil and Gas company, capitalized at \$1,250,000, and composed of New York and Pennsylvania capital, with Harris Walthall, of El Paso as attorney and one of the directors, is a new concern which has entered the Texas oil fields and below Tampico, Mexico. The plan of this company is to build up a big operating concern on holdings already acquired and it is acquiring more.

Attorney Walthall said last Saturday that the company had already procured 1900 acres in Jack county, Texas, and was moving on its first rig to start operations 15 miles north of Jackboro. The company is already procuring all land in the Ranger field.

Pankey Plays Lone Hand In Drilling Well

Acting Governor Of New Mexico Is Sinking For Oil On His Ranch.

Santa Fe, N. M., April 21.—Acting governor Pankey, forming no company and selling no stock, gave out information that he is sinking an oil well on his ranch, 25 miles from Santa Fe, and is now down 200 feet and making progress daily. The well is going down about three miles from the site of the well which put down 2100 feet four years ago, which had excellent indications when the tools stuck.

Pankey says he will go 4000 feet before he quits, but has the advice of expert geologists that all indications are good for striking oil.

FINISH FISHING FOR TOOLS AND RESUME DRILLING

Cisco, Texas, April 21.—H. O. Harvey and associates have about concluded a fishing job in their 3000 foot hole near Putnam, Calhoun county, and will resume drilling in a day or two. Two strings of tools were in the hole. The first string was 2500 feet long, between Putnam and Hald. E. H. R. Green of New York is having material placed on the ground for a test three miles south of Putnam. The Humble Oil and Refining company is acquiring a large block of acreage north of Putnam, and associates are working on location for a second well a quarter of a mile southeast of Putnam.

Among Oklahoma visitors to Texas this week, was Charles Alexander, of Oklahoma City, a state bank examiner, who was scouting for prospects for himself and some associates.

FOUR WELLS COME IN AT RANGER; NO 1000 CLASS

Four new wells in the Ranger field are reported to be 1000 feet or more in the thousand barrel class. However, it was said that something better was hoped for from deeper drilling in all of them.

Dursey, Morrison and Gehlbach's Harrison No. 3 showed 50 barrels from a sand 240 feet but the total depth was 245 feet. The Humble Oil and Refining company's Putnam No. 2 at 2500 feet was now down 2500 feet. The Texas and Pacific Coal and Oil company's Huffman No. 2 was making 250 barrels a day. The bridge continued the drill had reached 2500 feet.

The States Oil Corporation Norwood No. 1, east of the town of Eastland, was making 40 barrels from 2100 feet but the drill was going down. The Harrison No. 2, Brown No. 1, south of Cisco was reported having 100 feet of oil standing in the hole after having been down 2500 feet. The well being broken and the well being cleaned out.

REPORTS STATUS OF WELLS IN SHACKLEFORD COUNTY

The status of drilling operations in Shackleford county, Texas is given as follows:

Standard No. 1 drilling at 1200 feet; Empire Gas company, No. 1 Reynolds, fishing at 2100 feet; Bene-dict and Treas, Natl No. 1, fishing at 550 feet; Standard No. 2, fishing at 550 feet; drilling at 2000 feet; Texas-Cushing No. 2, Calhoun, drilling at 490 feet; Murphy & Bolens, No. 2, Conrad, rig up; Texhoma Oil company, Black No. 1, rig up and machinery installed to begin drilling; Day 1; Texas company, Webb No. 2, drilling at 2000 feet; expect strike Moran sand at 2100 feet; Oil Co. location, made on Pol-dexter ranch, survey No. 29; The Sinclair No. 1, Wilkeson, drilling at 1145 feet; Sun company, Reynolds No. 1, Throckmorton county, drilling at 1400 feet; Sun company, Matthews, drilling at 495 feet, Throckmorton county.

TWO WOMEN FORM FIRM TO EXPLORE FOR OIL

The latest entrant in the way of oil companies is one to exploit a section of land three miles from Paloma, hot springs Sierra county, New Mexico, and the second company to operate on a half section in the Hueso Basin, east of El Paso county. The two companies are to be named the Dorate-Norates Oil company, No. 1 and No. 2. The first will exploit the Palomas holding and No. 2 in the Hueso Basin. The promoters of these companies are Mrs. Josephine Clinton, of El Paso, and Mrs. Dorothy Dana, of San Francisco, Cal.

"We shall soon have our companies formally completed," said Mrs. Clinton. "Everything is practically arranged except the formal organization. We are already negotiating for a drill to commence actual work."

VALLEY OIL COMPANY NOW DRILLING ON LAST LAP

The news from the Valley Oil company's well at Columbus, N. M., is to the effect that drilling into the softer formation below the black line was resumed. Early morning after a cessation of operations for setting the casing and letting the cement harden. The drill resumed at nearly 2100 feet on what is thought to be the last lap.

E. C. Kniffen, general manager of the company, left El Paso several days ago to look after the resumption of drilling which is expected to reveal something in the way of oil development.

WILL DRILL IN DEWITT COUNTY, TEXAS, FOR OIL

Cuern, Texas, April 21.—The Dewitt Oil and Gas company has been formed here with a capitalization of \$24,000, fully subscribed by local folks. A deep well on the Hamilton farm will be sunk by the company.

This company and two others will drill in the vicinity of Yorkum, Yorktown and Northham.

Several large outside companies have also taken large land leases in this county with guarantees to put down test wells soon. Oil excitement is high all over Dewitt county.

NEW TEXAS REFINERY

Houston, Texas, April 21.—Interest by the boom sweeping Texas, the Houston Ice and Brewing company will operate a refinery at the junction of the Houston and Texas Central and Trinity and Brazos Valley railroads, which has been inactive for the past 20 years. The refinery will have a daily capacity of 1500 barrels a day and represents an investment of \$400,000.

FORM TULARESA COMPANY

E. W. Harrison, of El Paso, reports a deal by which he has disposed of six sections of oil holdings in the Tulareosa basin of New Mexico, to be exploited for oil. The holding, held by the project are R. M. Griswold and E. A. Leavenworth of Trinidad, Colo.; J. C. Swale of Waco, Texas; N. M. and Edmund Gardner, of El Paso. The company called the Tulareosa Estate, Ltd., is said to be already formed.

EXPECT LINE 3000

The Prairie Oil and Gas company's No. 3 Gustin in the northwestern part of Stephens county, Texas, a wildcat, is reported as down 2500 feet. It is expected that the black line will be struck at 3000 feet.

DIG FOR LOST TOOLS

The Lone Star Oil and Gas company is reported having a fishing job at 2500 feet for a string of lost tools. It is claimed that there is only feet of oil in the hole.

EL PASO HERALD

MORE NEW WELLS IN BURKBURNETT

Burkburnett Field Brings In a Number of New Producers Lately.

Wichita Falls, Tex., April 21.—Completions at Burk Burnett for the week ending, Saturday, were:

Amalgamated Oil company No. 3 Garner, 150 barrels, 1600 foot sand.

Burkburnett Production company No. 1 Van Cleave, 150 barrels, 1600 foot sand.

Blew Goss Oil company No. 2 Hardin, 225 barrels, 1600 foot sand.

Brown and McAllister No. 2 Hardin, 225 barrels, 1600 foot sand.

L. R. Crowell No. 2 Logan, 100 barrels, 1600 foot sand.

Canada Oil company No. 1 Van Cleave, dry at 1745 feet.

Floyda Oil company No. 1 Jones, 180 barrels, 1620 foot sand.

Gamble and Art No. 1 Parson, 100 barrels, 1630 foot sand.

J. W. Gilliland No. 14 Hardin, 550 barrels, 1600 foot sand.

J. W. Gilliland No. 13 Hardin, 820 barrels, 1600 foot sand.

J. W. Gilliland No. 20 Hardin, 150 barrels, 1600 foot sand.

Healdton Oil and Gas company No. 1 Hardin, 250 barrels, 1600 foot sand.

McQuire, 100 barrels, 1600 foot sand.

Panhandle Drilling company No. 1 Pickett, 100 barrels, 1600 foot sand.

Powers Oil company No. 2 Hardin, 225 barrels, 1600 foot sand.

Robinson Petroleum company No. 2 Pickett, 100 barrels, 1600 foot sand.

Sibley Taylor Oil company No. 2 Hardin, 275 barrels, 1600 foot sand.

Staley Petroleum company No. 1 Hardin, dry at 1700 feet.

Sunset Oil and Gas company No. 1 Miller, 100 barrels, 1600 foot sand.

Victory Petroleum company No. 2 Pickett, 15 barrels, 1800 foot sand.

Wade Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

Woods Oil company No. 2 P. P. Langford, 250 barrels, 1600 foot sand.

GAS IN "BIG BEX"

Bryan, Texas, April 21.—A strong pressure of gas is showing in Big Bex way No. 1 in the southern part of Bryan county. It is down only 500 feet. The Lamb Springs well in Grimes county field is drilling again. The broken casing having been removed.

TO DRILL ON OLD WELL

Temple, Texas, April 21.—The Warwick well, abandoned many years ago, will be reclaimed by the Bell Williamson Oil company. It is near Jarrell. After being sunk to a depth of 1500 feet it was abandoned. The Bell County Oil company has made it its location on Edge Ridge west of Belton.

No Humbug!
Lift Off Corns

Doesn't hurt a bit to lift a corn or callus off with fingers

For a few cents you can get a small bottle of the magic drug free-

one recently discovered by a Cincinnati man. It produces 147 barrels from the top of the sand. This company has made three locations on the Warren field using two star rigs and one standard.

Just think! Not one bit of pain before applying freezone or afterwards. It doesn't even irritate the surrounding skin.

Hard corns, soft corns, or corns between the toes also hardened calluses on bottom of feet, just seem to shrivel up and fall off without hurting a particle. It is almost magical.

Ladies! Keep a tiny bottle on your dresser and never get a corn or callus ache twice.

FOR BILIOUSNESS AND INDIGESTION TAKE A CALOTAB

The new nausealess calomel that is purified and refined from all sickening and dangerous effects.

You have heard of smokeless powder, colorless iodine and tasteless quinine—now get acquainted with nausealess calomel—the best calomel that is wholly delightful in its effect, yet retains all of the system-purifying and liver-cleansing qualities of the old-style calomel.

Your doctor will tell you that calomel is the best and only medicine for biliousness, headache, indigestion, constipation and now that it is pleasant to take everybody is taking Calotab, the new calomel with all of the liver benefits and none of the string.

One tablet on the tongue at bedtime, with a swallow of water—that's all. No taste, no nausea, no pain, no danger of salivation. Next morning you wake up feeling fine, your liver thoroughly cleansed, all biliousness, headache, constipation and indigestion removed. Eat what you please, no danger.

Calotabs are sold only in original sealed packages, price thirty-five cents. All druggists are authorized to refund the price if you are not delighted with Calotab.—Adv.

The Hand of Opportunity!

IN just a few days more the Hand of Opportunity will reach out to you, giving you a chance to invest your money in an

OIL & REFINING COMPANY

—that will DRILL FOR OIL and BUILD A MAMMOTH REFINERY to take care of the oil already produced. The capitalization of this company will be large enough to FINISH WHAT IT STARTS and the men behind it are known for their integrity and "SQUARE-DEAL" methods.

We always investigate before we recommend, and we are indeed glad to
